

Turner Midcap Growth Fund

INVESTOR CLASS (TMGFX)

SECOND QUARTER 2011

Why Turner Midcap Growth Fund?

- Industry-focused research: experienced team of accountable investment professionals.
- Style purity: consistent exposure to midcap growth stocks and application of investment strategy.
- Fully invested: minimal cash position.

Expense Information

Turner has contractually agreed to waive fees and reimburse Fund expenses to keep the Fund's "Total Annual Fund Operating Expenses after Fee Waivers and Expense Reimbursements" (excluding acquired fund fees and expenses and interest expenses relating to short sales) from exceeding 1.18% through January 31, 2012. Only the Board of Trustees of the Turner Funds may terminate the waiver prior to January 31, 2012. Turner may discontinue this arrangement at any time after January 31, 2012.

Inception date 10.1.96.

PERFORMANCE INFORMATION

The performance data quoted represents past performance. The principal value and investment return will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data shown here. Returns shown, unless otherwise indicated, are total returns, with dividends and income reinvested. Returns spanning more than one year are annualized. Fee waivers are in effect; if they had not been in effect performance would have been lower. Mutual fund investing involves risk, including potential loss of principal. Performance can vary over short time periods. Please call 800.224.6312 or visit our website at www.turnerinvestments.com for most recent month - end performance. Past performance is no guarantee of future results. Please see important risk information on reverse.

IMPORTANT INFORMATION

Effective October 1, 2010, the Turner Funds are distributed by Foreside Fund Services, LLC, Portland, ME. The investor should consider the investment objectives, risks, charges and expenses carefully before investing. This information can be found in the prospectus. A free summary or statutory prospectus, which contains detailed information, including fees and expenses, and the risks associated with investing in this fund, can be obtained by calling 800.224.6312 or by visiting www.turnerinvestments.com. Read the prospectus carefully before investing. Past performance is no guarantee of future results. Mutual fund investing involves risk, including potential loss of principal. Holdings are subject to change. Funds that take a focus or sector specific approach are subject to greater risk from downturns affecting a specific issuers or industry.

The medium capitalization companies in which the Fund invests may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, these medium capitalization companies may have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, medium capitalization stocks may be more volatile than those of larger companies. The Fund is subject to risks due to its foreign investments. Foreign investments may be riskier than U.S. investments because of factors such as foreign government restrictions, changes in currency exchange rates, incomplete financial information about the issuers of securities, and political or economic instability. Foreign stocks may be more volatile and less liquid than U.S. stocks. The Fund's ability to buy and sell securities frequently may result in higher transaction costs and additional tax liabilities.

Alpha is a measurement of a fund's risk-adjusted performance against the Russell Midcap Growth Index. Standard deviation is a measurement of dispersion of a set of data from its mean. R-squared is a measurement of how much a fund's performance reflects the returns from the relevant market.

The Russell Midcap Growth Index measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. The stocks are also members of the Russell 1000 Growth Index. The index mentioned is an unmanaged statistical composite of stock market performance. Investing in an index is not possible.
